2011 IDAHO WHEAT VARIETIES

Brundage, a soft white winter wheat was the most popular variety accounting for 9.6 percent of the wheat seeded in 2011. Westbred 936, a hard red spring variety, was Idaho's second most popular wheat variety with 8.9 percent. The remaining top five varieties in 2011 are; Alturas, a soft white spring, third with 6.6 percent; Klasic, a hard white spring, fourth with 6.5 percent and Jefferson, a hard red spring, fifth with 4.9 percent of all wheat planted.

Comparing 2011's top five varieties with where they ranked in 2010, Brundage and WestBred 936 switched places for the top two varieties. Alturas remained unchanged as the third leading variety. Klasic and Jefferson switched fourth and fifth position.

By class, soft white winter wheat accounted for 42.2 percent of all wheat acres, up from 37.1 in 2010. Hard red spring wheat accounted for 19.3 percent which was down 1.8 percentage

points from 2010. The third most popular class in 2011 was soft white spring, accounting for 14.2 percent in 2011 compared to 15.7 percent of all wheat acres in 2010. The fourth most popular class in 2011 was hard red winter, accounting for 11.8 percent in 2011 compared to 14.3 percent of all wheat acres in 2010. Overall, 31.1 percent of the 2011 wheat crop was hard red winter and spring wheat, down 4.3 percentage points from 2010. Soft white winter and spring wheat accounted for 56.4 percent, up 3.5 percentage points from 2010. The remaining 12.4 percent of the wheat planted was hard white wheat, club wheat and durum wheat.

This publication includes estimates for the twenty wheat varieties with the largest acreage planted. A supplemental publication showing estimates for 30 additional varieties is available under the publications link on our website, from the Idaho Wheat Commission, and by direct request to our office.
